

# FROM THE PHILIPPINES

Many a man came back from the Philippines a score of years ago with teeth so badly worn and decayed that they were practically useless. These men had average good teeth when they left. A little care, a visit to the dentist for some trifling repairs would have saved their teeth. You men who may be called to the front should profit by this lesson. Don't wait till the last minute. Come here today and let me look over your teeth.

## In Canal Three Hours.

A Grant "Six" automobile purchased recently by Harry McPate, of this city from the Winner Auto Sales Company, underwent a rather unusual test as it was submerged in the Potomac River on Saturday last. The car was submerged for about three hours in six feet of mud and water.

The car, supported by the bottom of the canal, was completely unharmed. The only visible part being the number plate attached to the radiator. After a lapse of three hours the machine was hauled upon the bank, the water and mud drained from the crank case and carburetor, and the car was driven off under its own power. The ignition and starting systems were absolutely unaffected by the untimely bath, and operated immediately.

Outside of being covered with mud, the car showed no signs of damage, and the car was removed and the car cleaned not a single trace could be found which would indicate its experience. The upholstery was not injured in the least, and apparently the machine received hardly a scratch.

Philadelphia, since the days when Ben Franklin trudged into the old town with a loaf of bread under his arm, has been dubbed "flow" by its citizens. But Philadelphia is now going in for speed in the automobile race. In the suburbs of the Greater City there are a number of motordromes which will hold 20,000 spectators. Experts say that the two races to be held in the near future in the country, and they are buttressing the turns with heavy timbers to make the track withstand a speed of 140 miles per hour.

Probably this track will be the scene of a remarkable performance, with the big honors won by men who have yet to be heard from. There is no doubt about that. It is not to be denied that the automobile has become a problem for the everyday driver can conquer by following the path the racing drivers pursue.

# WHITE TRUCKS

## A GOOD TRUCK Is a Good Investment

ANY firm who needs a motor truck should not look upon it as an expense but as an investment—because a good truck will earn money.

You would not buy bonds or real estate because of low cost regardless of future value and earnings. The same reasoning applies to truck buying.

The higher first cost of a White Truck is more than justified by the low maintenance cost—low operating cost—and its resistance to years of hardest service.

The re-sale value of a White Truck after five years' service is higher than the first cost of some trucks now on the market.

White Trucks are built in a variety of types and sizes to meet every need.

## TROOP A IS BROUGHT TO WAR STRENGTH

District Guard Cavalry Now Trying to Recruit Troop C.

Troop A, District National Guard, was brought to full war strength of 115 men yesterday, making two District cavalry units now on a war footing.

Recruiting efforts will now be centered in the immediate organization of Troop C, which also is to be brought to war strength.

In order to speed up the work of filling the ranks of this third cavalry unit, Mr. John C. White, of the District Guard Medical Corps, will be detailed the first of next week to the recruiting station headquarters, 132 1/2 street northwest, to give immediate physical examinations to all applicants when they apply.

Sergeant Lester Jones, of Troop B, head of the United States Coast and Geodetic Survey, was commissioned a second lieutenant yesterday of Troop B. Several officers of the other troops may be assigned to Troop C, it is believed, as soon as more men are enlisted.

Troops A and B both appeared in the Centennial veterans' parade yesterday. They brought forth a great many expressions of praise for the service, and other branches of the service, was only normal yesterday. Officers are expecting a big increase in the number of applications before the draft goes into effect.

## BILL WOULD CREATE MUNITIONS BRANCH

McFadden Introduces Measure for Establishment of New Portfolio.

That much talked of "Department of Munitions" is now embodied in the provisions of a bill introduced yesterday by Representative McFadden, of Pennsylvania. He writes in his bill that the department would "foster, promote and develop the industrial resources of the United States in behalf of the national defense." Among the purposes of the department would be the purchase and acquisition of "clothing, ammunition, food, armaments, armor, ordnance, ordnance stores, vessels, machines, machinery, aeroplanes and other aeronautical equipment, railroad materials and equipment, animals, fuel and all other raw or manufactured materials" required by the army and navy.

Representative McFadden would have the department act as purchasing agent for foreign allies of this country. He would supplement the Council of National Defense in a measure, for he wishes that body as well as the army and navy and all other branches of the public service to hand over pending contracts on materials which his proposed department would handle.

The bill pays the secretary of the department \$2,000, three assistant secretaries, \$2,000 each, and a solicitor \$3,000.

## MEN "JOSH" FOUGHT INVISIBLE TO POLICE

So Judge Rules He Was Drinking and Slips Him a Fine.

A policeman strolling near Third and N streets northwest Wednesday evening noticed "Josh" Drinker, colored, with a group of men. One of the men the policeman couldn't see. He arrested Drinker, who insisted in Police Court yesterday morning he was talking with some friends, even though they were not visible to the naked eye. He was fined \$10 for drunkenness.

**Did Juanita Swear?**  
"Judge I don't care. I'm a church member," said Juanita Sullivan, colored, with a group of men, charged with disorderly conduct. Octavia Moore, the complaining witness, said Juanita used language which didn't belong in church, when Octavia went to collect a board bill. Drinker was a top-up and dismissed the case.

**Law Hits Victrolas.**  
Both branches of the Police Court adjourned early yesterday, after confining a half hour earlier than usual. The majority of cases were persons charged with violating the excise laws. Despite the broad construction applied to the law by police department, in regard to out-of-town offenders, quite a number paid fines or were put on parole, after promising to leave town.
